

HUGO

The Leitz HUGO lenses are small, fast, lightweight and as close focusing as possible with iconic Leica M lens glass creating character at capture. The full set includes 13 full frame lenses. The 9-lens HUGO I series ranges from 18mm to 135mm, all T1.5/T1.9. The HUGO II series offers 3 focal lengths at T2.1, with a new 66mm. The stunning 50mm T1.0 HUGO N rounds out the set.

M GLASS CHARACTER

The Leitz HUGO lenses use the same glass as Leica M lenses to bring their rich colors, artful flares, and rounded image field into the world of moving pictures with uncompromising quality, durability, and flexibility.

READY FOR SET

Featuring a production-ready mechanical design, the Hugo lenses come with rigid LPL mounts, as well as the traditional cine orientation of focus and iris scales, expanded focus scales with a 270° rotation, and greatly increased close focus ability. Easily change mounts to Leica L mount as well.

COMPACT AND FEATHER WEIGHT

New small, lightweight housings make for incredibly compact lenses starting at 1.78 lbs / .81 kg, and between 2.7 - 4.8" (68 - 121mm) in length.

COMPATIBILITY

The optical design of some HUGO lenses includes a rear element that protrudes beyond the LPL mount into the body of the camera. Some camera systems and 3rd party LPL mounts do not allow safe use of these lenses.
